ACPRAC colleagues,

After some discussion, Scott and I have decided to CANCEL the Fri July 20 ACPRAC meeting. We have no decision/action items. We thought it would be more efficient to send you a few updates via email.

Class Section Builder
ACPRAC members are invited to join us in celebrating the launch of Class Section Builder (CSB). This is the new section scheduling software for building and maintaining the schedule of classes. Currently we have 180 users trained to use the software and campus response has been positive.

Event Information:
Thursday, July 26, 2018
3:00 – 5:00PM
Pyle Center Lee Lounge and Courtyard
Light refreshments and a cash bar will be provided.
Please RSVP here: https://go.wisc.edu/ejvsf2

Guide
Business as usual.
Archive pdf files are now posted. (Jocelyn is excited about this because this is the version of the Guide that will be used for the HLC Accreditation Project!)

Lumen Courses
Business as usual.
Summer is not the busiest time for course proposals.

Lumen Programs

1.We are on schedule for Lumen Programs implementation.
Last Friday afternoon the vendor passed the form back to us and we opened it up for testing on Monday (7/16).
We’ve engaged a number of individuals in testing specific elements and that is ongoing this week.
All ACPRAC members are invited to explore the form – for instructions see:
https://apir.wisc.edu/lumen-programs/
This is the final form – it has all elements implemented, except not the help documentation.
It version does have the floating SAVE button, which was very important to us and a big “get” from the vendor.
Any questions about the form – please send them to Jocelyn.

2.Expanded Lumen Programs Working Group – we have expanded the membership of Lumen Programs to support the transition from form building to form implementation and use.
We appreciate all the additional school/college colleagues who’ve agreed to be involved, especially over the next few months.
If you want to be part of this group but haven’t been contacted, let Jocelyn know.

Lumen Data
Last week Nate the LeepFrog data guy came to visit for a three-day data sprint. It was amazing, and a whole lot of fun, and quite exhausting. We had lots of good discussion and made decisions about some next steps. The good news is that we have a plan for accessing all of the Courseleaf/Lumen data, and a vision for making reports available to campus user groups. It’s a start. We’ll have more about that at our August ACPRAC meeting.

That’s what we have for now. We expect we’ll have agenda items for the next ACPRAC meeting, scheduled for August 17, 10:30-noon.

Thanks all, Jocelyn
