DiscoverPD is a competencies framework and planning tool for University of Wisconsin-Madison master’s and doctoral students. Features include:

- a skills self-assessment and activity tracker,
- customized reports and professional development recommendations, and
- a database of 400+ in-person and online opportunities.

The framework outlines skills, competencies, and attributes developed through graduate study. It helps students identify and articulate their transferable skills, and provides scaffolding to plan professional development activities and write an Individual Development Plan (IDP). It is informed by national and disciplinary reports about graduate student professional development and career outcomes, and was developed with input from UW-Madison faculty, students, and staff.

The Versatile PhD is a web-based resource and online community for exploring non-academic careers. While many areas of the site are open to the general public, the UW-Madison Graduate School Office of Professional Development and Office of Postdoctoral Studies purchase an institutional membership, which means that current students, faculty, staff and alumni get access to the high-quality PhD Career Finder of the Versatile PhD site. Versatile PhD features include:

- a web-based community for discussion and networking;
- example résumés, CV-to-résumé conversions, and cover letters that resulted in PhDs/ABDs securing non-academic jobs;
- first-person narratives about how PhDs and ABDs established their non-academic careers; and
- live and archived panel discussions featuring PhDs and ABDs working in non-academic fields.

ImaginePhD is a career exploration and Individual Development Plan tool for the humanities and social sciences. It is a free online resource that facilitates career exploration by inviting users to evaluate and reflect on their own skills, values and interests and to investigate related career opportunities. An equally important component of the tool is its goal setting application – My Plan – which enables the user to map out next steps in their PhD programs and for their career and professional development.

myIDP is a web-based career-planning tool tailored to meet the needs of PhD students and postdocs in the sciences. Features include:

- exercises to examine skills, interests, and values;
- twenty scientific career paths matched to users skills and interests;
- a tool for setting strategic goals, with optional reminders; and
- career exploration articles and resources.
